solid surface

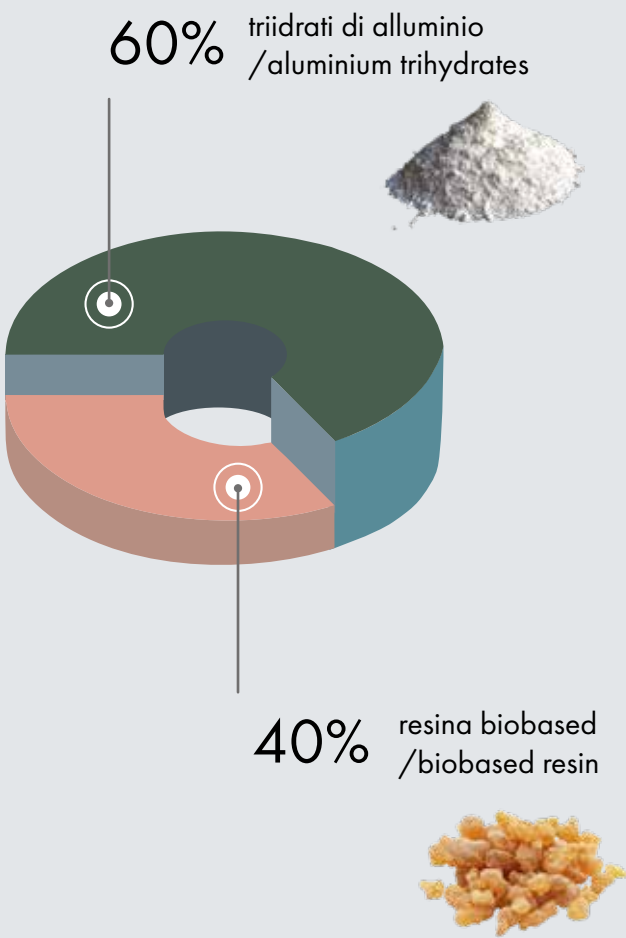

La scelta di introdurre il solid surface nella nostra gamma non è stata casuale, ma il risultato di un’attenta ricerca volta a offrire materiali che combinano estetica e funzionalità. Questo materiale, con il suo caratteristico effetto soft touch, si distingue per una bellezza che richiama la pietra naturale levigata, aggiungendo un tocco di eleganza contemporanea agli ambienti bagno.

Il solid surface è composto da cariche minerali, principalmente triidrati di alluminio, legate a resine naturali **Biobased**, ottenute da coltivazioni di mais provenienti da fonti controllate. Questo lo rende un materiale non solo performante, ma anche allineato con i valori di sostenibilità che guidano le nostre scelte.

Le sue proprietà intrinseche lo rendono straordinariamente versatile: è igienico, piacevole al tatto, resistente e facilmente lavorabile, consentendo la realizzazione di forme complesse e personalizzate. Le formulazioni esclusive di questo materiale, garantiscono prodotti che rispondono alle esigenze dei progettisti e degli utenti finali, offrendo un equilibrio perfetto tra innovazione tecnologica e raffinatezza estetica.

triidrati di alluminio + resina biobased
/aluminium trihydrates + biobased resin

The decision to introduce solid surface into our range was not made lightly, but is the result of careful research aimed at offering materials that combine aesthetics and functionality. This material, with its characteristic soft-touch effect, stands out for its beauty reminiscent of polished natural stone, adding a touch of contemporary elegance to bathroom spaces.

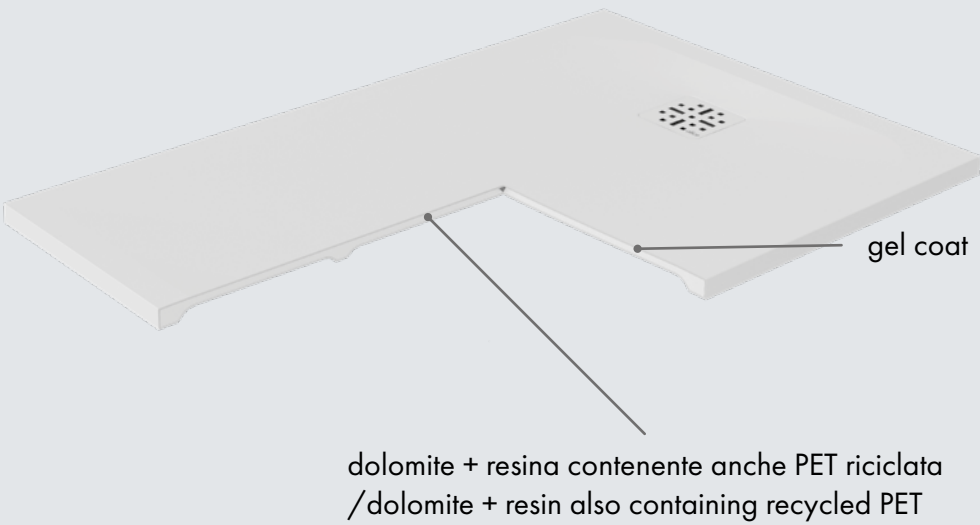

Solid surface is composed of mineral fillers, primarily aluminum trihydrate, bonded with **Biobased** natural resins derived from controlled corn cultivation. This makes it not only a high-performance material but also one aligned with the sustainability values that guide our choices.

Its intrinsic properties make it extraordinarily versatile: it is hygienic, pleasant to the touch, durable, and easily workable, allowing for the creation of complex and customized shapes. The exclusive formulations of this material ensure products that meet the needs of designers and end users, offering a perfect balance between technological innovation and aesthetic refinement.

mineral marmo

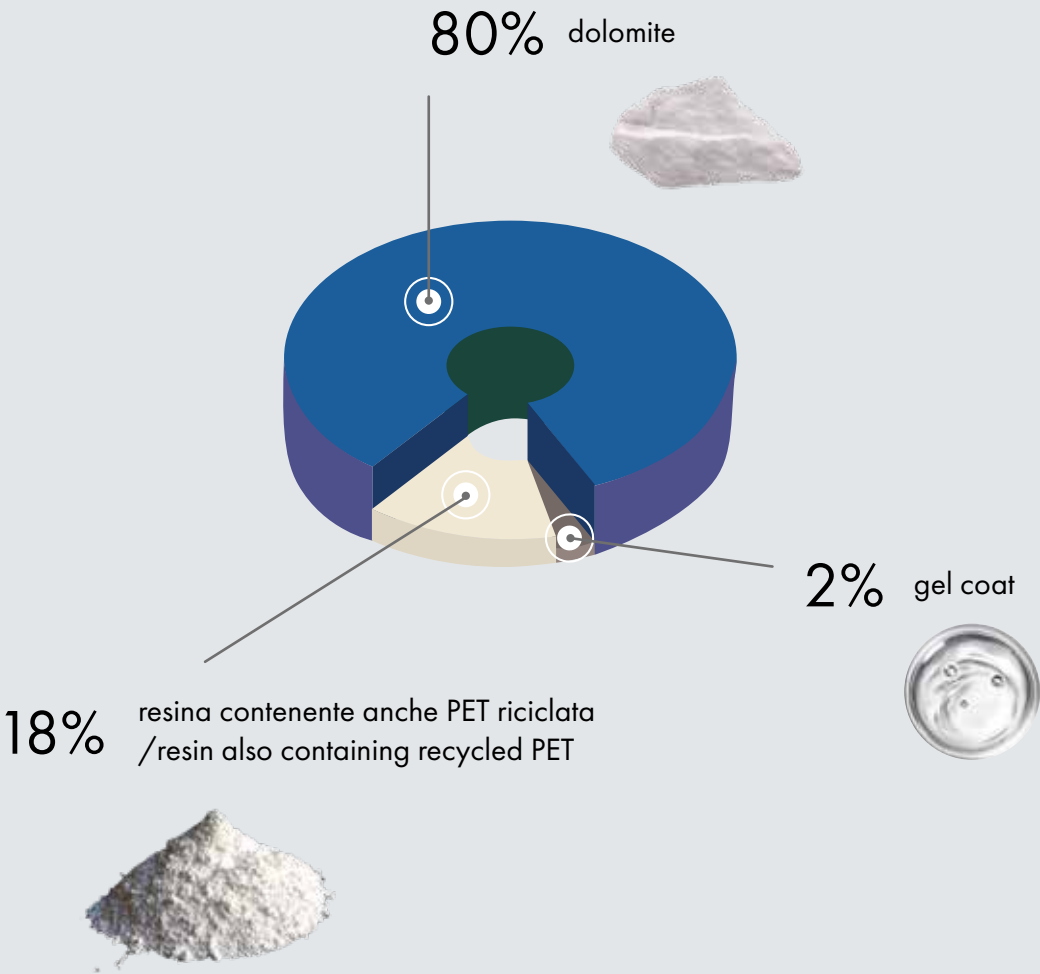

Il mineral marmo è un materiale innovativo che fonde la bellezza della pietra naturale con i vantaggi della tecnologia moderna. Realizzato con **dolomite** e **resine**, tra cui una componente di **PET riciclato**, questo materiale si distingue per la sua sostenibilità, contribuendo a ridurre l'impatto ambientale senza sacrificare qualità o prestazioni. La superficie è rivestita da uno strato protettivo di **gel coat**, che assicura una finitura liscia e resistente, mantenendo il prodotto facilmente manutenibile nel tempo.

I piatti doccia in mineral marmo sono disponibili in due affascinanti finiture: la **Beton**, che offre una superficie texture cemento, donando un tocco elegante e sofisticato, e la **Tera 2.5**, che emula l'aspetto della pietra naturale, creando un effetto texture che richiama l'autenticità e la matericità della roccia. Queste opzioni permettono di soddisfare diverse esigenze stilistiche, combinando design innovativo e praticità in un'unica soluzione di alta qualità.

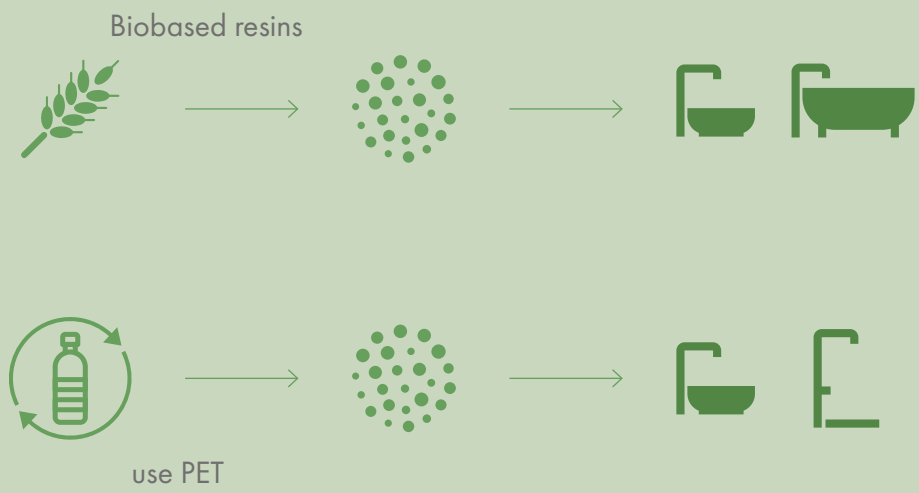

Cast marble is an innovative material that combines the beauty of natural stone with the advantages of modern technology. Made from **dolomite** and **resins**, including a component of **recycled PET**, this material stands out for its sustainability, helping to reduce environmental impact without compromising on quality or performance. The surface is coated with a protective layer of gel coat, ensuring a smooth, durable finish that remains easy to maintain over time.

The mineral marmo shower trays are available in two captivating finishes: **Beton**, which offers a matt, concrete surface for an elegant and sophisticated touch, and **Tera 2.5**, which mimics the appearance of natural stone, creating a textured effect that evokes the authenticity and materiality of rock. These options cater to different stylistic needs, blending innovative design and practicality into a high-quality solution.

resine Biobased e plastica riciclata / Biobased resins and recycled plastic.

Per questa selezione di prodotti, Alice Ceramica si affida a partner produttivi specializzati che condividono un approccio concreto alla sostenibilità, alla ricerca sui materiali e alla riduzione dell’impatto ambientale. I lavabi in solid surface e mineralmarmo presenti in questa sezione possono essere realizzati con materiali che integrano resine di origine biobased e resine contenenti PET riciclato, contribuendo a ridurre l’utilizzo di componenti di origine fossile e a valorizzare materiali provenienti da filiere di recupero.

For this product selection, Alice Ceramica relies on specialised manufacturing partners who share a concrete commitment to sustainability, material research and the reduction of environmental impact. The solid surface and mineral marble washbasins featured in this section can be made with materials that include bio-based resins and resins containing recycled PET, helping reduce the use of fossil-based components while enhancing materials coming from recovery and recycling chains.

UNA SCELTA PIÙ CONSAPEVOLE / A MORE CONSCIOUS CHOICE

Attraverso questa proposta, Alice Ceramica amplia il proprio catalogo con soluzioni selezionate secondo criteri di qualità, durabilità e maggiore attenzione all’ambiente. L’obiettivo è promuovere un modo più responsabile di progettare e abitare il bagno, valorizzando prodotti sviluppati con attenzione al ciclo di vita dei materiali, al recupero degli scarti e all’ottimizzazione dei processi produttivi. Through this proposal, Alice Ceramica expands its catalogue with solutions selected according to criteria of quality, durability and greater environmental awareness. The aim is to promote a more responsible way of designing and living the bathroom, enhancing products developed with attention to the life cycle of materials, the recovery of production residues and the optimisation of manufacturing processes.

pensare in modo sostenibile. / think green.

ARIA

I materiali impiegati dai partner produttivi selezionati sono sottoposti a verifiche relative alle emissioni di composti organici volatili in ambienti chiusi, secondo standard internazionali come la certificazione GreenGuard Gold, riconosciuta anche come contributo ai criteri LEED. I controlli vengono effettuati periodicamente da laboratori terzi indipendenti.

AIR

The materials used by selected manufacturing partners are tested for emissions of volatile organic compounds in indoor environments, according to international standards such as GreenGuard Gold certification, also recognised as a contribution to LEED rating criteria. Tests are periodically carried out by independent third-party laboratories.

ENERGIA

I processi produttivi dei partner selezionati sono sottoposti ad audit e controlli energetici periodici, finalizzati all’ottimizzazione dei consumi di energia elettrica e gas naturale. L’integrazione di energia da fonti rinnovabili rappresenta un ulteriore passo verso un modello produttivo più responsabile e orientato alla decarbonizzazione.

ENERGY

The production processes of selected partners are subject to periodic energy audits and checks, aimed at optimising electricity and natural gas consumption. The integration of energy from renewable sources represents a further step towards a more responsible production model, oriented towards decarbonisation.

RIUTILIZZO

La ricerca sui materiali condotta dai partner produttivi è orientata anche al recupero degli sfridi di produzione, sia solidi che polverulenti, con l’obiettivo di reintrodurli, dove possibile, nel processo primario e/o in processi secondari. Questo approccio permette di ridurre gli sprechi e di valorizzare nuovamente materiali che altrimenti verrebbero scartati.

REUSE

The material research carried out by manufacturing partners is also focused on the recovery of production residues, both solid and powdery, with the aim of reintroducing them, where possible, into the primary process and/or secondary production processes. This approach helps reduce waste and gives new value to materials that would otherwise be discarded.

MATERIALI

Il solid surface può essere prodotto con resine di origine biogenica, provenienti da fonti rapidamente rinnovabili, riducendo al minimo l’utilizzo di resine di origine fossile. La selezione dei materiali risponde così a criteri di qualità, resistenza e maggiore attenzione all’impatto ambientale.

MATERIALS

Solid surface can be produced with resins of biogenic origin, sourced from rapidly renewable resources, reducing the use of fossil-based resins to a minimum. The selection of materials therefore responds to criteria of quality, resistance and greater attention to environmental impact.

RIFIUTI

Una quota significativa degli scarti generati nei processi produttivi dei partner viene recuperata e destinata ad altre filiere manifatturiere, contribuendo a ridurre la quantità di rifiuti non valorizzati e a favorire una gestione più responsabile delle risorse.

WASTE

A significant share of the waste generated by the partners’ production processes is recovered and directed to other manufacturing chains, helping reduce the amount of non-recovered waste and supporting a more responsible management of resources.

IMBALLAGGI E PROCESSI

I partner produttivi selezionati lavorano allo sviluppo di imballaggi più sostenibili, con la progressiva sostituzione del polistirolo con il cartone. Altri interventi riguardano l’utilizzo di energia da fonti rinnovabili, i cicli di produzione a freddo e il recupero dell’energia termica in eccesso a supporto dei processi produttivi.

PACKAGING AND PROCESSES

Selected manufacturing partners work on the development of more sustainable packaging, with cardboard progressively replacing polystyrene. Other measures include the use of energy from renewable sources, cold production cycles and the recovery of excess thermal energy to support production processes.

certificazioni / certifications

Alice Ceramica seleziona prodotti realizzati da partner produttivi specializzati, sottoposti a controlli e verifiche da parte di enti certificatori riconosciuti a livello internazionale. Le certificazioni e le dichiarazioni disponibili accompagnano i prodotti e i materiali selezionati, contribuendo a garantire qualità, tracciabilità e conformità nei diversi mercati di riferimento.

Alice Ceramica selects products manufactured by specialised production partners, subject to checks and assessments by internationally recognised certification bodies. The available certifications and declarations refer to the selected products and materials, helping to ensure quality, traceability and compliance across different target markets.

Made in Italy

ISO 9001:2015

Marcatura CE / CE marking

La marcatura CE fa riferimento al Regolamento Europeo 305/2011 per i prodotti da costruzione. Il regolamento definisce criteri di tracciabilità e conformità per diverse categorie di prodotto, stabilendo requisiti tecnici, progettuali e prestazionali. Vasche, lavabi e piatti doccia destinati al mercato europeo devono essere accompagnati, ove previsto, da Dichiarazione di Prestazione DoP e marcatura CE. A seguito della Brexit, i prodotti destinati al mercato britannico possono richiedere marcature e documentazioni conformi ai requisiti locali, come la marcatura UKCA. La documentazione disponibile viene verificata in base al Paese di destinazione e alla tipologia di prodotto.

CE marking refers to European Regulation 305/2011 for construction products. The regulation defines traceability and conformity criteria for different product categories, establishing technical, design and performance requirements. Bathtubs, washbasins and shower trays intended for the European market must be accompanied, where required, by a Declaration of Performance DoP and CE marking. Following Brexit, products intended for the UK market may require markings and documentation compliant with local requirements, such as UKCA marking. The available documentation is checked according to the destination country and product type.

Certificazione C-UPC / C-UPC certification

La certificazione C-UPC è richiesta per la commercializzazione di prodotti sanitari e idraulici in Nord America. Il riferimento è lo Uniform Plumbing Code, codice modello sviluppato dalla International Association of Plumbing and Mechanical Officials, che definisce criteri tecnici e requisiti di installazione per gli impianti idraulici. I prodotti destinati ai mercati di Canada e Stati Uniti devono rispondere a specifiche normative locali. Quando applicabile, i prodotti selezionati da Alice Ceramica possono essere accompagnati da certificazione C-UPC, rendendoli idonei alla commercializzazione nei mercati nordamericani.

C-UPC certification is required for the sale of sanitary and plumbing products in North America. It refers to the Uniform Plumbing Code, a model code developed by the International Association of Plumbing and Mechanical Officials, which defines technical criteria and installation requirements for plumbing systems. Products intended for the Canadian and US markets must comply with specific local regulations. Where applicable, the products selected by Alice Ceramica may be accompanied by C-UPC certification, making them suitable for sale in North American markets.

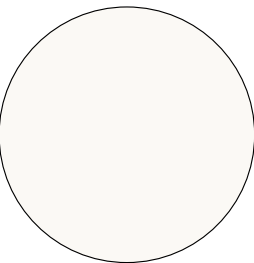

Certificazione UL GREENGUARD / UL GREENGUARD certification

La certificazione UL GREENGUARD valuta le emissioni di composti organici volatili, VOC, rilasciati dai materiali negli ambienti interni. Scegliere prodotti a basse emissioni contribuisce a migliorare la qualità dell'aria indoor in abitazioni, uffici, scuole, strutture ricettive e ambienti collettivi. La certificazione GREENGUARD Gold prevede criteri ancora più restrittivi in termini di emissioni VOC ed è pensata anche per ambienti frequentati da persone più sensibili, come bambini e anziani. I materiali selezionati per questi prodotti, tra cui solid surface e mineralmarmo, possono essere accompagnati da certificazione GREENGUARD Gold, secondo la documentazione fornita dal partner produttivo.

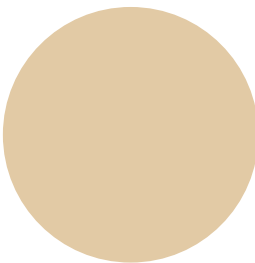

UL GREENGUARD certification assesses the emissions of volatile organic compounds, VOCs, released by materials in indoor environments. Choosing low-emission products helps improve indoor air quality in homes, offices, schools, hospitality spaces and collective environments. GREENGUARD Gold certification sets even stricter criteria for VOC emissions and is also intended for environments used by more sensitive people, such as children and the elderly. The materials selected for these products, including solid surface and mineral marble, may be accompanied by GREENGUARD Gold certification, according to the documentation provided by the manufacturing partner.

VASCHE / BATHTUBS

Il bagno come luogo dove vivere il Benessere assoluto, in un rituale sospeso nel tempo e nello spazio. Questa collezione di vasche freestanding, è nata per regalare atmosfere suggestive, dove relax e intimità si accompagnano alle parole bellezza e design.

Le vasche sono realizzate in solid surface e Mineralmarmo; tutte esprimono grande qualità produttiva e design esclusivo, con un attento studio del colore e con finiture superficiali che ricordano al tatto la pietra naturale levigata.

The bathroom is a place where we can experience total wellbeing and create rituals suspended in time and space. This collection of freestanding bathtubs was developed to create evocative atmospheres, where relaxation and intimacy go hand in hand with beauty and design.

The bathtubs are made of solid surface and mineralmarmo; all feature high quality manufacturing and exclusive design, along with carefully selected colours and surface finishes reminiscent of the touch of natural polished stone.

LAVABI /WASHBASINS

Linee essenziali e un ricercato studio della forma che incontra la luce per dar vita ad elementi d'arredo esclusivi. I lavabi trovano origine nel vero design, dove l'estetica abbraccia sempre la funzionalità. Qui la materia resta protagonista, priva di ogni futile accessorio, ed è all'origine della forma stessa. Le qualità del solid surface permettono di dar vita a forme inedite, colori pieni, grande flessibilità progettuale, il tutto racchiuso nella grande solidità strutturale, anche negli spessori più ridotti.

Minimalist lines and an in-depth study of how shape interacts with light as a means of creating exclusive furnishing elements. The washbasins are rooted in true design, in which aesthetics always embraces functionality. The material reigns supreme, devoid of all trivial accessories, and plays a key role in the actual design. The qualities of solid surface enable highly unusual shapes and vibrant colours to be produced offering great flexibility in terms of design, all embodied within great structural solidity, even where thicknesses are reduced.

PIATTI DOCCIA

SHOWER TRAYS

Le collezioni dei piatti doccia sono state sviluppate con lo scopo di esaltare i sensi. Ogni dettaglio è disegnato per regalare armonia e integrare questo elemento in modo totalizzante nel design progettuale. L'impiego sapiente del Mineralmarmo permette di creare finiture superficiali che giocano con il senso del tatto e ricreano gli effetti della pietra, del cemento, dell'ardesia. Qui la materia si plasma ai nostri desideri e si fa portatrice di stile, eleganza, carattere.

The shower tray collections have been developed with the aim of enhancing the senses. Every detail is designed to create harmony and to fully integrate this element into the overall design concept. The skillful use of Mineralmarmo makes it possible to create surface finishes that engage the sense of touch and recreate the effects of stone, concrete and slate. Here, matter is shaped according to our desires and becomes an expression of style, elegance and character.

INSTALLAZIONI CONSIGLIATE
/ RECOMMENDED INSTALLATIONS

I nostri piatti doccia sono realizzati con struttura a massa piena. Questa caratteristica permette di effettuare tagli personalizzati senza compromettere la stabilità strutturale o il corretto appoggio a terra del prodotto.

REGOLE PER UN TAGLIO A REGOLA D'ARTE

Per garantire la massima durata e resistenza del piatto, è necessario seguire queste tre indicazioni:

Area di Rispetto: Non effettuare tagli all'interno del quadrato 40×40 centrato intorno allo scarico. Questa zona è la più sollecitata durante l'uso e deve rimanere integra.

Gestione degli Angoli: In caso di tagli sagomati (ad esempio per aggirare una colonna), evita angoli vivi. Lo spigolo interno deve avere una curvatura con raggio minimo di 8 mm.

Finitura dei Bordi: Il taglio rimuove lo strato superficiale di gelcoat (1 mm). Pertanto, il lato tagliato non è idoneo per l'installazione a vista e deve essere sempre posizionato contro la parete o incassato.

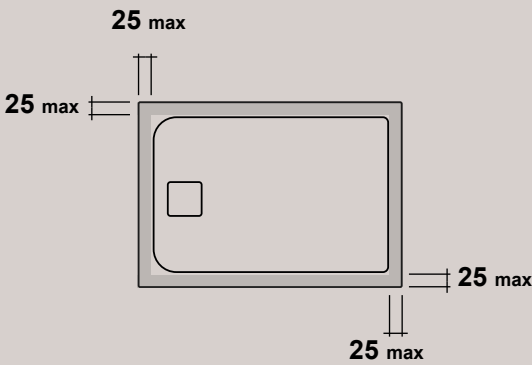

PER IL TAGLIO IN CANTIERE, UTILIZZARE ESCLUSIVAMENTE DISCHI DIAMANTATI O IN WIDIA: L'ELEVATA ABRASIVITÀ DEL MATERIALE RICHIEDE LAME SPECIFICHE PER GARANTIRE UN TAGLIO NETTO E PRESERVARE L'UTENSILE

limiti di taglio / shear limits

Questi piatti doccia presentano una conformazione cava sul lato inferiore, con un bordo perimetrale di appoggio di 30 mm e nervature centrali di rinforzo. Per mantenere l'integrità strutturale, il taglio richiede accortezze specifiche.

LIMITI E MODALITÀ DI TAGLIO

Taglio Standard (fino a 25 mm): È possibile rimuovere una striscia di materiale massimo di 25 mm, eseguendo tagli esclusivamente paralleli ai lati. In questo modo si preservano 5 mm del bordo perimetrale, garantendo la resistenza ai carichi e alle dilatazioni termiche.

Tagli Superiori a 30 mm o Sagomati: Qualora il taglio superi i 30 mm o non sia parallelo ai lati (es. scassi per colonne), il bordo di appoggio verrà rimosso. In questo caso è obbligatorio creare un supporto strutturale sotto la zona a sbalzo (utilizzando malta, spessori o poliuretano a bassa espansione) per evitare cedimenti.

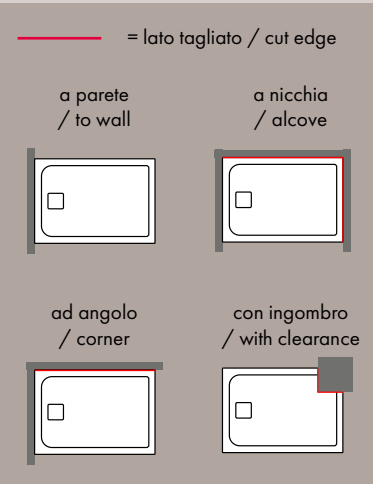

Gestione degli Angoli: Per i tagli sagomati, l'angolo interno deve avere un raggio minimo di 8 mm. Evitare spigoli vivi è fondamentale per prevenire crepe nei punti di concentrazione dello sforzo.

Finitura dei Bordi: Poiché il taglio rimuove lo strato superficiale di gelcoat, il lato lavorato non risulta rifinito. Il piatto deve quindi essere installato con il lato tagliato sempre adiacente alla parete o incassato.

FOR ON-SITE CUTTING, USE ONLY WIDIA OR DIAMOND BLADES: THE MATERIAL'S HIGH ABRASIVENESS REQUIRES SPECIALIZED TOOLS TO ENSURE A CLEAN CUT AND PREVENT RAPID BLADE WEAR

INSTALLAZIONI CONSIGLIATE
/ RECOMMENDED INSTALLATIONS

These shower trays feature a recessed underside with a 30 mm perimeter support edge and central reinforcement ribs. To maintain structural integrity, specific precautions must be taken during the cutting process.

CUTTING LIMITS AND METHODS

Standard Cut (up to 25 mm): You may remove a maximum strip of 25 mm, provided the cuts are strictly parallel to the edges. This preserves 5 mm of the perimeter support, ensuring resistance to loads and thermal expansion.

Cuts Over 30 mm or Shaped Cuts: If the cut exceeds 30 mm or is not parallel to the edges (e.g., cut-outs for columns), the support edge will be removed. In these cases, it is mandatory to provide structural support beneath the overhanging area (using mortar, shims, or low-expansion polyurethane) to prevent structural failure.

Corner Management: For shaped cuts, the internal corner must have a minimum radius of 8 mm. Avoiding sharp edges is essential to prevent cracking at high-stress points.

Edge Finishing: Since cutting removes the surface layer of gelcoat, the processed edge will not have a finished appearance. The tray must be installed with the cut side always positioned against the wall or recessed.

INFO
STOCCAGGIO PIATTI DOCCIA
SHOWER TRAY RACKING

I pezzi devono essere posizionati verticalmente e in modo stabile all'interno della gabbia, al fine di prevenire deformazioni durante il periodo di stoccaggio.

Parts must be placed in a stable, upright position within the crate to prevent deformation during storage.

I pezzi devono essere posizionati dal più grande al più piccolo in lunghezza per evitare la deformazione dei pezzi più grandi ed accumuli di peso indesiderati.

Parts must be arranged in descending order of length to prevent deformation of larger components and avoid unintended weight accumulation.

Consigliamo di fissare i pezzi una volta aperta la gabbia in modo da evitare la caduta degli stessi.

It is recommended to secure the parts immediately after opening the cage to prevent them from falling.

Oppure inserire degli inserti che occupino lo spazio del piatto doccia tolto dalla gabbia per ripristinare il vuoto lasciato.

Alternatively, insert spacers to fill the gap left by any removed shower trays to restore the required support.

Se la gabbia è visibilmente crollata impiegare reggette e/o strumenti di fissaggio per assicurarla e renderla stabile oppure sostituirla.

If the cage shows visible signs of collapse, use strapping and/or securing tools to stabilize it, or replace the unit entirely.

Per evitare il collasso delle gabbie aperte nel tempo distribuire correttamente il peso dei pezzi.

To prevent the collapse of open cages over time, ensure the weight of the parts is distributed evenly.
