ARTICOLI DA INCOLLARE SU PIASTRELLE

Il biadesivo in pura schiuma acrilica in dotazione è stato da noi testato con i più severi standard di qualità. Fatto per durare nel tempo, resiste molto bene all'umidità, all'acqua e al calore. **Può essere posizionato su tutte le superfici piane, lisce, lucide, opache e ruvide (rugosità ammessa 0.5 mm) ad esclusione di muri grezzi, intonaci e mosaici.**

Istruzioni di montaggio.

Pulire a fondo la superficie di appoggio con la soluzione di alcool e acqua (diluiti al 50%) e asciugare accuratamente con un panno pulito. **Non utilizzare prodotti per la pulizia contenenti silicone (di quelli antigoccia)!** Se la temperatura ambiente fosse molto bassa, riscaldare la superficie d'appoggio con l'asciugacapelli per alcuni secondi. Togliere la protezione di carta dall'adesivo facendo attenzione a non toccarlo con le dita. Applicare il supporto nella posizione desiderata aiutandosi con una livella. Per un corretto posizionamento, è consigliabile eseguire l'applicazione con l'aiuto di un'altra persona. **Premere fortemente con le dita tutti i lati del supporto per circa 20 secondi per permettere un'ottimale adesione dell'adesivo. Non caricare i supporti con nessun peso prima di 24 ore, per permettere una perfetta polimerizzazione dell'adesivo. Per garantire la tenuta dell'adesivo è obbligatorio utilizzare lo stick di primer allegato alla confezione secondo le seguenti istruzioni: dopo aver pulito la superficie di appoggio come precedentemente specificato, premere il flaconcino del primer nella zona centrale fino a rottura della capsula interna. Continuare a premere fino a quando il liquido non avrà imbevuto il tampone e quindi applicare un sottile strato di prodotto sulla superficie di appoggio e attendere 5 minuti perché il liquido asciughi. Applicare quindi il supporto dell'accessorio come in precedenza specificato. Eventuali sbavature del primer (incolore) possono essere eliminate con uno straccio imbevuto di alcool.**

Per staccare i supporti una volta applicati, utilizzare una spatola, forzando contro l'adesivo e facendo leva verso l'esterno. L'adesivo rimasto sulla superficie di appoggio potrà essere eliminato usando una spatola e quindi passando uno straccio imbevuto di acetone per unghie o trielina per una completa pulizia.

Consigli per la pulizia.

Lavare con detersivi neutri (pH 7) e acqua tiepida: non usare prodotti aggressivi quali acetone, alcool, detersivi per WC. ecc; non usare polveri o spugne abrasive; asciugare con panno morbido; non mettere in lavastoviglie.

TILE STICKERS

We have tested the 2-way acrylic foam adhesive supplied using the strictest quality standards. Made to last, it is particularly resistant to damp, water and heat. **It can be affixed to any flat, smooth, polished, matt or rough surface (maximum roughness 0.5 mm), excluding unsurfaced walls and plaster.**

Assembly instructions.

Clean the support surface thoroughly with a 50% solution of alcohol and water, and dry carefully with a clean cloth.

Do not use silicone-based products (non-drip type) for cleaning! If the room temperature is very low, heat the support surface with a hairdryer for a few seconds. Remove the protective strip from the adhesive, taking care not to touch the adhesive itself. Apply the support in the required position with the help of a spirit level. It is best to have someone with you to help with the correct positioning.

Press strongly with your fingers on all sides of the support for around 20 seconds to ensure optimum bonding. To guarantee perfect polymerisation of the adhesive, leave the supports for 24 hours before affixing any weight. To ensure perfect adhesion, the stick of primer included in the packaging must be used according to the following instructions: after cleaning the support surface as specified above, squeeze the middle of the primer vial until the capsule inside breaks. Continue squeezing until the liquid has soaked the application pad, then apply a fine layer of the product on to the support surface and wait 5 minutes for the liquid to dry. Then affix the accessory support as specified above. Any drips of the clear primer can be removed with a cloth dipped in alcohol.

To remove the supports after application, use a spatula to lever away the adhesive. Any adhesive remaining on the support surface can be removed with a spatula, after which the surface can be cleaned completely with a cloth dipped in acetone or TCE.

Cleaning recommendations.

Wash the stickers with neutral detergents (pH 7) and warm water. Do not use aggressive products such as acetone, alcohol, WC detergents, etc. Dry with a soft cloth. Do not place in a dishwasher.
